  - iii. Corbel Options
  - iv. Island End Options
- j. [Hood Options](#)
- k. [Decorative Hardware](#)
- l. [Lighting](#)
- m. [Cabinetry Styles \(cabinet codes\)](#)

## 2. [General Information](#)

Care, cleaning, and wood species characteristics

## 3. [Steps to Getting a Quote](#)

Basic step-by-step overview of the process from getting a quote to installation... what we'll need from you, the customer, to proceed in a timely manner and what to expect from Woodland in communication, lead times

## 4. [Limited Warranty and General Information](#)

## 5. [Millwork \(Finish Carpentry\) Supplemental Catalog](#)

PDF link to our molding catalog which includes crown, base, light rail molding along with panel, shiplap options. Available unfinished or pre-finished in any Woodland or custom paint/stain.

## FINISHES

EXTERIOR FINISH:

Please select one exterior finish option below

Classic-Paints (maple): \_\_\_\_\_

Classic-Stains (maple): \_\_\_\_\_

Paint (maple): \_\_\_\_\_

Naturals (walnut, oak): \_\_\_\_\_

Melamine: \_\_\_\_\_

Textured Melamine: \_\_\_\_\_

Other Woodland finish: \_\_\_\_\_

Click [here](#) to see full Woodland finishes list

Wood species is determined by finish selection. If you are requesting a custom/customized finish that varies in any way from our standards, please add notes regarding the wood species, finish type, and any other information that might be helpful. Edge banding will be determined by finish selection.

NOTES:

CUSTOM S.O. ORDERED?: Y N ORDER #: \_\_\_\_\_

INTERIOR FINISH:

*\*Exposed/open interiors will match exterior finish unless otherwise specified*

Clear coat maple plywood

Melamine: (Select one) \_\_\_\_\_

Custom: Please include details in notes below

NOTES:

## DRAWER BOXES

(Standard door hinges and drawer glides are **Blum Soft-Close**)

DRAWER BOX JOINTS: Click on icon at left to see type of joint based on drawer type selection

DRAWER TYPE:

Hardrock Maple Melamine (dowel)

White Melamine (dowel)

Baltic Birch Ply (dovetail)

Solid Maple (dovetail)

Other (Custom will incur upcharge. Please give details in notes below.)

ISLAND END 7

ISLAND END 8

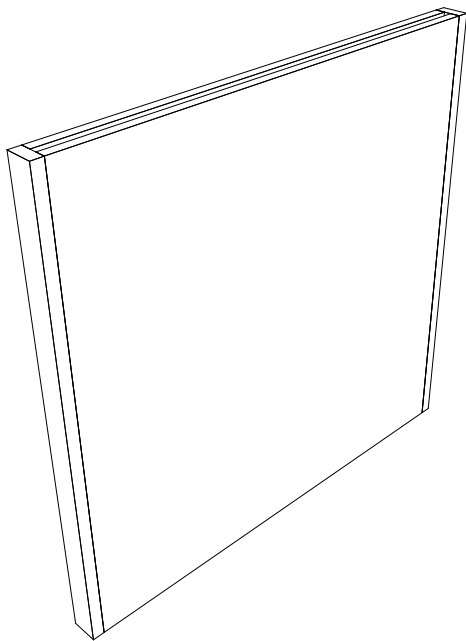

# ISLAND ENDS

END 1

## **Island End 1- Slab**

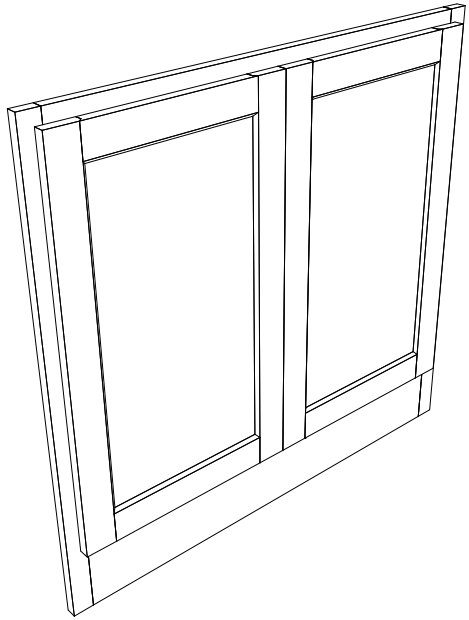

- 3/4" thick edge-banded sheet good
- Vertical or horizontal grain (Edge banding will always be vertical grain)
- Typically used for Euro style cabinets
- Depending on finish selection, V grooves can be added to simulate planking.

END 2

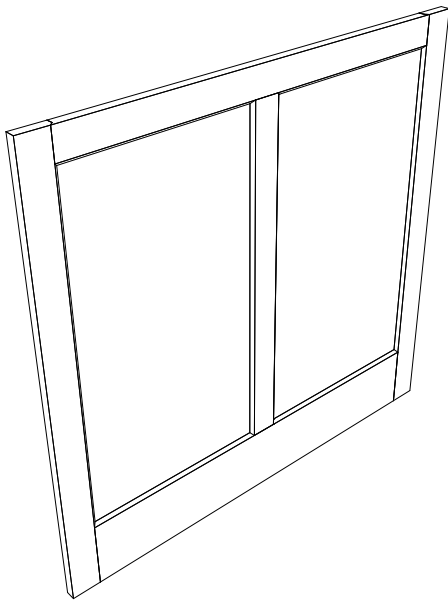

## **Island End 2- Slab Column**

- 2"-6" thick
- Vertical grain

**Island End 3- Add-on Door Panels**  
- Non-functional door panels

END 3

**Island End 4- Wainscot**

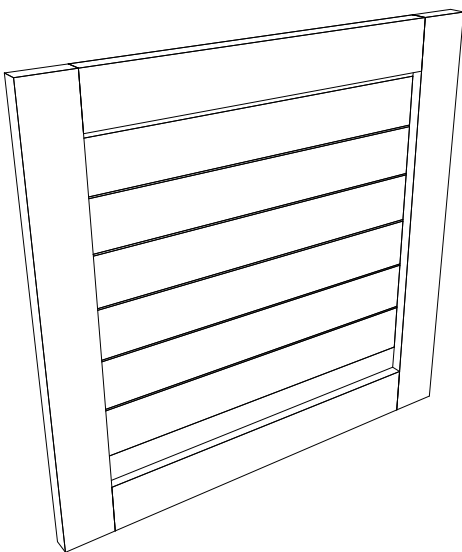

END 4

### **Island End 5- Shelves/Legs**

- Width is leg option plus 1 1/2"
- Choose from any of the leg options
- Depth can be customized to accommodate books, depending on island design.

END 5

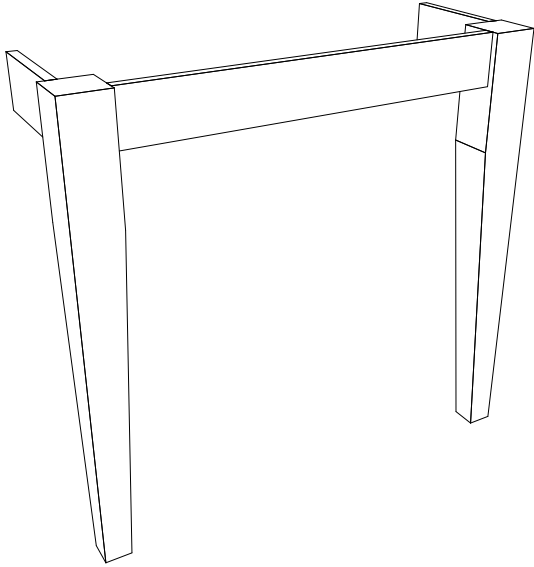

### **Island End 6- Planked End**

- 1 3/8" thick frame
- Vertical or horizontal planks
- 4" planks (or specify)

END 6

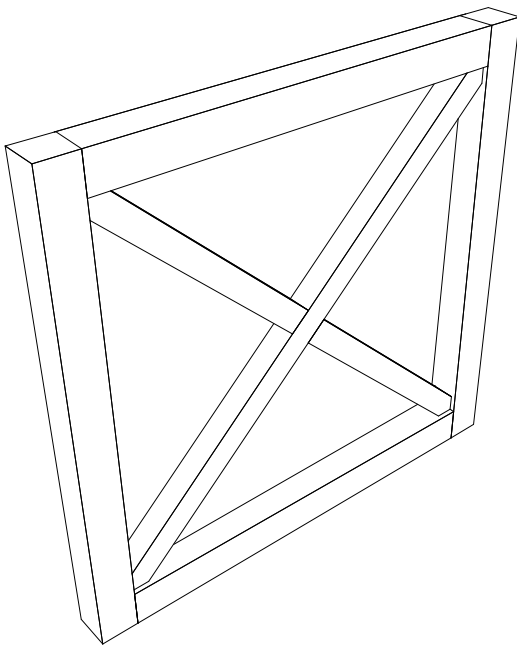

# ISLAND ENDS

## Island End 7- Legs w/ Aprons

- Specify depth for countertop overhang
- Choose from any of the leg options
- Specify apron width (depending on the leg option selected)

END 7

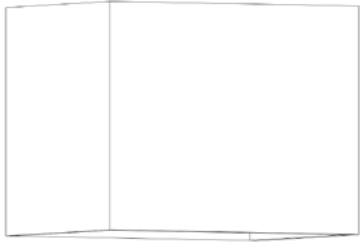

## Island End 8- X-Island End

- 2 3/4" x 2 3/4" frame
- "X" is 1 7/8" x 1 7/8"
- 36" or 48" wide

END 8

# GENERAL INFORMATION

Under normal conditions, all wood products contain some moisture, and wood readily exchanges moisture with the environment. This is true of all wood products, whether they are raw or finished. Although a finish will slow this process, wood will continue to react to changes in humidity and environment.

Wood does not change size or shape unless its moisture content changes due to humidity conditions of the environment. When humidity conditions are high, wood absorbs moisture and swells (or expands). In low humidity conditions, wood releases moisture and shrinks (or contracts).

Wood products perform successfully when correctly used in a proper environment. Woodland selects and uses only properly kiln-dried woods with a 5%-8% moisture content to ensure stability in climate controlled homes. Relative humidity inside the home should be maintained within a range of 40%-50%. Homes without proper temperature and climate control will likely experience problems with dimensional change of the wood. Care should especially be taken during site storage and installation.

## Care

- Take extra care when placing heavy, sharp, or abrasive items on your piece.
- Extreme moisture or dryness will cause panel expansion or contraction, joint separation, veneer checking or cracking and, possibly, delaminating may occur (veneers separating from their substrate).
- Avoid placing hot pots or pans directly on your piece. Instead, use hot pads or trivets to protect the finish.
- Wipe up spills quickly to avoid cloudiness or blushing.
- Never put solvent based liquids on your piece which potentially can melt the finish.

## Cleaning

- Furniture and other wood polish is not recommended as it will cause build-up on the finish.
- Mix a few drops of dish detergent with a gallon of clean warm water. Dip a clean cloth into the solution and use where needed on your furniture/cabinetry to remove oil and dirt. Quickly wipe dry with a clean cloth.
- Avoid using household cleaners on your woodwork. Many contain harsh chemicals which can discolor, weaken, and/or leave clarity blocking residue.
- Avoid using household furniture cleaning and polishing products. These products may temporarily leave unwanted residues which attract dust and reduce clarity over time, lowering the overall beauty of the piece.

## Maintenance

- Clean as needed as described above.
- Over time and due to everyday use, light surface scratches will appear on your finish. To fill these light scratches and renew the clarity and beauty of your piece, a furniture paste wax (i.e. Briwax, Fiddes, or LakeOne), may be applied every 6-12 months or as desired.

## Touch Up Kit

- A touch-up kit for each finish color used in your project will be sent with your order.

## Wood Characteristics

Wood is a natural resource, exposed to many variables as it grows. Wood responds to its environment and creates unique grains and characteristics largely considered the best part of its enduring beauty. These include naturally-occurring deposits, knots, sap runs, and worm holes. The result is an unpredictably beautiful product where no two pieces are exactly the same; even within the same species, it will vary in color, texture, and grain. For many people, these variances are part of the charm and elegance of wood cabinetry, but a too-wide variation can affect the overall result in a room. As a result, even though Woodland will hand-select wood within the project to minimize a drastic variation, a mild variation can still result.

In helping customers choose the best finish, the following should be kept in mind:

- Paint Finishes: Much of the wood grain will be lost to a paint finish.
- Stain Finishes: The wood grain will be exaggerated under a stain finish. In an extremely open grain, color-change will be dramatic, creating a larger grain variation.
- Aging: Wood gets darker or lighter with age. This process increases when exposed to light (particularly sunlight).
- Cleaning: Harsh chemicals, heat, or excessive moisture will also discolor natural wood.

## Wood Types

### Maple

- Color: Overall creamy-white color. Variations in color can range from white to light brown.
- Grain: Close-grained hardwood that is characterized by its smooth texture. Relatively uniform, but can have patches of lighter density (keep in mind for darker stains). In addition, may contain mineral streaks.
- Finishing: Maple is good with paints and stains, although dark stains tend to accentuate the less-dense grain, creating a mottled appearance.

### Cherry

- Color: Largely characterized by its red undertones. Variations in color from white to a deep, rich brown.
- Grain: Close-grained with a fairly uniform texture.
- Finishing: Stain finishes will noticeably darken over time, which is a well-known aspect of those who select a stained Cherry finish.

### Alder

- Color: Similar to Cherry, ranging from a light honey color to a reddish-brown hue.
- Grain: Has a straight, fine-textured grain similar to Cherry.
- Finishing: Takes well to paints and stains, but will lighten with exposure to extreme sun light.

### Rustic Alder

- Color: Light-brown with reddish undertones.
- Grain: Known for its knots, of various sizes and colors. Besides frequent knots, has a

straight, fine-textured grain similar to Cherry.

- Sound Closed Knot: Is not moveable (up to 3" diameter)
  - Sound Knot with Cracks: Non-moveable knots with open cracks (up to approximately 1" in length)
  - Open Knot: Preferred by customers requesting this wood species. Range can go up to roughly the size of a penny. Holes are desirable and are left unfilled.
  - Unsound Knot: Knots with a moveable core are removed and treated, as above.
  - Knot Clusters: A cluster of tight, sound knots are expected in Rustic Alder.
  - Worm Holes / Pin Holes: Can go through door and are expected in species (up to 1/4" diameter).
  - Worm Tracks: Expected and common, up to 8" long and 1/8" wide.
- Finishing: Takes well to paints and stains, but will lighten with exposure to extreme sun light. Knots will be a tighter grain and are generally already darker than the rest of the raw wood

## Oak

- Color: White Oak tends to be a light beige through brown. Red oak has pinkish and reddish hues
- Depending on the type of cut, be it flat sawn, quarter sawn, or rift sawn it can have waves, curls, or straight grain - all with uneven texture. Ray pattern that runs alongside grain is unique. In red oak, it can sometimes look like someone took a dark pencil and drew dotted lines across a board.
- Finishing: Oak's light coloring makes it a great choice for staining. Wire-brush distressing is commonly done on oak to create additional texture and makes oak a great choice for aged, worn-looking stain finishes.

## Walnut

- Color: Light brown to dark chocolate, with some blonde or yellow as well. More subdued, overall grayish tone. Unfinished/clear-coated walnut lightens slightly over time, unlike cherry, maple and oak which all darken as they age.
- Grain: Straight-grained, but sometimes with waves or curls which enhance the character of a piece.
- Finishing: Walnut is often clear-coat finished to bring out the natural grains, but has a refined, quality look when stained also. Our Antwerp finishes on walnut are lightly wire-brushed with a colored wax application to enhance the grain.

# STEPS TO GETTING A DATE

- Step 1 (Customer) Send us your floor plans, elevations, and/or inspiration images. We will contact you and confirm the following information:
- Cabinetry allotment
  - Time frame
  - Scope of project
  - Project specifications-design direction
- Step 2 (Woodland) Based on the current project information, we will provide you an initial estimate.
- Step 3 (Customer) Once you review the estimate and approve it, a 25%-50% design deposit is required.
- Step 4 (Woodland) We will contact you to coordinate gathering the field measure dimensions, appliance specifications, house molding information, and finish samples.
- Step 5 (Woodland) Stain and paint colors you have chosen will be made into 5"x 10" finish samples or "Strike Offs" for your review and approval. Rejected colors will be remade with the recommended changes within a reasonable amount of time (Max 1-2 per room depending on size – additional samples may be purchased)
- Step 6 (Woodland) We will provide "Approval Drawings" of your cabinetry to fit the current project space.
- Step 7 (Customer) You will either sign & approve, or redline & reject these approval drawings. Redlined/ rejected drawings return immediately to our drawing queue to be updated according to the noted changes. These will be resubmitted to you within a reasonable amount of time.
- Step 8 (Woodland) Once "Approval Drawings" and "Strike Off" samples have been approved and signed, a final "Quote" or project total will be provided, covering any changes made per your request throughout the approval process.
- Step 9 (Customer) The second approval deposit for 25% is required at this time. Changes resulting from an error on our part will not be charged to you. See "Please Note" below for more info.
- Step 10 (Woodland) Once drawings and finishes samples are approved, we will provide your DELIVERY/SHIP DATE.

## PLEASE NOTE:

- Though changes are common during the approval process, excessive changes to design, floor plans, and project specifications will delay delivery and increase cabinet costs.
- Changes requested throughout the approval process or after a project delivers are called "Change Orders". "Change Orders" that need to be rushed during the installation of a project, will be charged a rush processing fee.
- The final 50% project payment for your project will be invoiced within 2-weeks prior of your ship/delivery date.
- If Woodland is providing the installation, half the installation cost will be included with the final 50% payment. The remaining half of the installation cost will be due once the installation is complete.

# LIMITED WARRANTY

As the original consumer of cabinetry products by WOODLAND, you have purchased cabinetry built to the highest standards of workmanship and materials.

## LIFETIME

We will repair or replace all defective drawer slides and hinges for the lifetime of the product.

## 5 YEARS

We will repair, replace, or re-manufacture all defects in material and workmanship of our products for 5 years from the date of purchase. We will repair, replace or re-manufacture doors that are warped ¼" or more, excluding single panel doors wider than 24" or higher than 48" for 5 years from the date of purchase.

### Limitations

The option to either re-manufacture, replace or repair defects, as well as the performance of the work required under this limited warranty, are subject to the determination or approval of Woodland. This warranty only applies to the original consumer purchase of these products and at the original site of installation only. We do not warrant against defects and malfunctions caused by misuse, abuse, on-site modifications, improper installation, environmental conditions, failure to store products in a climate controlled environment, neglect and other defects not arising from our materials or workmanship. We do not warrant against colorfastness of the finish or the aging, yellowing or discoloration of our products unless caused by a defect in material or workmanship, as determined by a factory representative. We also do not warrant against finish damage caused by fire, excessive heat, water, smoke or other chemical exposure. We reserve the right to alter the specifications and styles of our products without notice, although every attempt will be made to duplicate the original product. Replacement parts are subject to availability from our suppliers.

### Consequential Damages

WE EXCLUDE AND ARE NOT RESPONSIBLE FOR ANY CONSEQUENTIAL AND INCIDENTAL DAMAGES ARISING FROM THE BREACH OF ANY EXPRESS OR IMPLIED WARRANTY, including, but not limited to, expenses incurred in shipping, removal and re-installation of any item or product, unless otherwise prohibited by Law.

### Performance

To obtain performance under this Limited Warranty, you must contact the authorized dealer from which you purchased your Woodland products and report the nature of all potential defects. If the dealer is unavailable, you may write, e-mail, or call our Customer Service department at (208) 523-9006

### Punch List

Woodland will perform one final walk through with the Customer or Customer's Representative prior to closing the project. It is imperative that the customer perform a thorough site visit prior to the final walk through

with a Woodland Representative. This allows the Customer the opportunity to become aware of any issues needing to be discussed with Woodland's Representative at the final walk through. Customer / Customer's Representative and a Woodland Representative signature will be required at final walk through indicating all punch list items to be completed. Any project additions / changes made after punch list form has been signed will be considered a change order at the Customer's expense, excluding warranty items.

Upon completion of punch list items, Customer / Customer's Representative and a Woodland Representative will sign the punch list form again acknowledging punch list is closed. Any change orders in regards to the punch list will be addressed as soon as our production calendar will allow.

Woodland will schedule project production upon receipt of the Customer/Customer Representative's production deposit and signature on approval drawings, finishes, and warranty acknowledgement.
